Italian 258	3 Pino, Exoticplants1, Fignutty	I-258 is a great producer and great tasting, knocked out Black Madeira for the best tasting fig with exotic berry taste. Not really sure what exotic berry tastes like and have not heard anyone actually describe the taste not sure why but there was a lot of chatter on the forums earlier this year regarding this newly discovered Swiss fig and some big bids on eBay went for >\$1,00 for cuttings. Waiting for reports on how this fig performs for the many happy new owners. looks delicious and would probably do well here in Fresno Ca.
Ponte Tresa	3 Pino, fignutty, Brianm	excellent taste
Black Madiera	2 Newbie, fignutty	most striking interior I have seen photos, super excellent taste, needs hot, not cold hardy, medium black, late producer
Galicia Negra	2 fignutty, Eboone	Paolo Belloni's signature fig not in wide circulation. Looks like a super concentrated VdB, looks delicious
Luv fig (wolf)	2 Pino, Fignutty	Very difficult to root and grow. Many fake varieties Flavor supposed to be amazing. Originally 5 Ischia figs of high quality were brought over from the island of Ischia. The original names were lost. The Ischias were named black, green, brown, white and yellow. Ischia black similar to bordeaux minus thick stalk very popular, the large yellow was discarded, green became synonymous with Strawberry verte, the white seems to have disappeared and the brown was also lost.
UC.Davis Black Ischia	2 Pino, Brianm	Bass's Favourite fig lot of demand due to productivity and quality of brebas; a San Pedro but in the North early is important. top producer for breba's 2016 is Granthams Royal. Beats Latarrula, Desert King and Osborne large black, many excellent breba, late ripe, very sweet flavourful fig, best taste, attractive red skin and pinkish insides Looks great big producer
