Italian 258	Pino, Exoticplants1, Figfanatic57, figgary, 6 Fignutty, Paully22	I-258 is a great producer and great tasting, knocked out Black Madeira for the best tasting fig with exotic berry taste. Not really sure what exotic berry tastes like and have not heard anyone actually describe the taste not sure why but a lot of chatter on the forums earlier this year regarding this newly discovered Swiss fig and some big bids on eBay. Waiting for reports on how this fig performs for the many happy new owners. looks delicious and would probably do well here in Fresno Ca.

Galicia Negra	4 figgary	hot, not cold hardy, medium black, late producer Very difficult to root and grow. Many fake varieties Flavor supposed to be amazing. Originally 5 Ischia figs of high quality were brought over from the island of Ischia. The original names were lost. The Ischias were named black, green, brown, white and yellow. Ischia black similar to bordeaux minus thick stalk very popular, the large yellow was discarded, green became synonymous with Strawberry verte, the white seems to have disappeared and the brown was also lost.
